Introducing for the small business:

All the management control information and computer systems services previously available only to the largest corporation.

Taranto
& ASSOCIATES, INC.
MICROCOMPUTER SALES & SERVICES

121 Paul Drive, San Rafael, CA 94903

If you're a small businessman, you may have recently installed a microcomputer or are thinking about utilizing one for the first time. If so, this page has been designed for you.

The computer is no longer a sophisticated tool that can be used only by large corporations. Today you can buy a computer for a few thousand dollars that fits on a table top—and does everything a room full of computers used to do.

The moderate price of these microcomputers makes it possible for the small businessman to utilize the computer for the first time to make his business run more efficiently—and more profitably.

That doesn't mean you have to go out and hire a high-salaried technician once you've decided upon a computer. But it does mean you will need adequate systems and programs to make the computer work for you.

And this has often been a problem. Up to now. Now Taranto & Associates helps you control your business with the same kind of systems available only to large corporations. We do this through a complete spectrum of modestly priced computer software specifically designed for the small business.

Problems need solutions.

Taranto & Associates approaches the use of the computer a little differently than most firms. We want to find the solution to your specific problems. In other words, we are solution oriented, not machine oriented. We are dedicated to the use of the computer on a personal level to help the small business operate more efficiently.

Taranto & Associates doesn't push computers. We don't push programs or systems. What we do is find ways problems can be solved with new equipment or new systems for equipment presently being used.

We'll tell you honestly what you need and what you don't. (If it isn't practical for you to set up a system, we'll tell you that. We'll also tell you if you need a larger system than our programs are suited for. What we want is what you want too: the best solution to your specific needs.)

We sell solutions.

Once Taranto & Associates draws up specifications for the type of computer to be used, our work really begins. We then set up the programs and systems to help you use it most efficiently. In most cases, it is more feasible to use programs that are already available. If we don't have them, we know where to find them without wasting your time and effort.

We will also order necessary supplies—from ribbons to disks to tape. We'll worry about the electrical power, the work space, the air conditioning—everything that is part of preparing an efficient system. We do all the worrying so that you don't have to. Once everything is in operation, we will also keep you advised on the latest techniques to help you improve your use of your computer.

In short: we offer you solutions to your problems. Maybe it's just a disk you need. Or a carton of them. Or a book. Or sheets of paper. No problem is too small for us to tackle. (But each solution is always the right one for you.)

Not all programs are alike.

In addition to our consultant services, Taranto & Associates offers complete accounting and inventory control systems for the small computer. Our programs have been devised for the most efficient use of your time and the time on the computer. They are practical, economical, and have been simplified to adapt easily to your business. They are supplied in the most usable form, to help you extend the capabilities of your microcomputer.

Once you have used our programming systems, you will understand why they are so widely praised. Each has been prepared with the kind of expertise that can only come from years of experience and a dedication to seeing a job well done. Utilizing one of our systems is like adding a computer expert to your staff—without the added cost.

Meet Irwin Taranto.

The head of Taranto & Associates, Irwin Taranto, has been involved in computer-based systems for almost a quarter-of-a-century. His particular emphasis has always been on making the computer work more efficiently for man—translating the problem-solving of the user's requirements into meaningful computer processing. He has helped many small businesses use a computer for the first time—ranging from carpet stores to shoe stores to truck parts suppliers.

Before setting up his own company, Mr. Taranto supervised computer program installations for Radio Corporation of America and Western Electric Co. The major areas of application included retailing, medical record keeping, general accounting and financial accounting. He was an early developer of modular program technique and was elected a Charter Member of the RCA Systems Achievement Club after developing multi-programming environment for second-generation computers.

Mr. Taranto is a certificated adult teacher by the State of California and his seminars on the use of the microcomputer are widely attended. Today he is sincerely dedicated to helping the small businessman run his business more efficiently through the use of the computer.

His background and dedication are the reasons why you will find Taranto & Associates at the foreground of innovative programming as the use of small computers expands into new areas.

SYSTEM DEFINITION QUESTIONNAIRE - CP/M

For efficiency and ease of operation, your system will be generated according to your defined specifications. You should be as accurate as possible in answering the following volume questions. There will be sufficient leeway when your system is generated. Do not use higher volumes than are necessary, lest a shortage of disk space result. Maximum volumes require 64K memory and 2 megabytes of disk storage.

Kind of machine .....
Kind of terminal .....
Number of disk drives on system .....
(Single or Double Density)

GENERAL LEDGER

1. How many accounts are in your chart of accounts including title, heading and total accounts? .....
2. What is your average monthly transaction volume? .....
(Each credit or debit entry is a transaction)
3. How many months of account summary do you want? .....
(Minimum 0, Maximum 12)
4. Do you want the account number to print on the financial statement? .....
(If no, account number will still print on trial reports)

ACCOUNTS RECEIVABLE/INVOICING

5. Maximum number of customers you may have? (Maximum 2000) .....
6. Maximum number of Open (unpaid) Invoices? (Maximum 1500) .....
7. Should A/R integrate to Inventory? .....
(Yes or No. Of course you must have purchased our Inventory)
8. Should A/R integrate to General Ledger?
(Yes or No. Of course you must have purchased our G/L) .....
9. Should invoice number be generated automatically? .....
10. Should system print zero and credit balance statements? (yes or no) .....

ACCOUNTS RECEIVABLE BALANCE FORWARD

11. Maximum number of customers you may have? (Maximum 2000) .....
12. Maximum number of monthly transactions (Maximum 11,000) .....
13. Should A/R Integrate to General Ledger? .....
(Yes or No. Of course you must have purchased our G/L)

ACCOUNTS PAYABLE

14. Maximum number of vendors you may have (Maximum 1400) .....
15. Maximum number of open (unpaid) invoices? (Maximum 1400) .....
16. Should A/P integrate to General Ledger? .....
(Yes or No. Of course you must have purchased our G/L)
17. Should purchase order number be generated automatically? .....
18. Is job costing distributions desired ? .....
NOTE: THE TOTAL NUMBER OF VENDORS plus the total number of open invoices may not exceed 2000.

PAYROLL

19. How many employees will you have over the course of a year? .....
(Maximum 300)
20. How many pay periods per year? .....
(Weekly = 52, Biweekly = 26, Semi-monthly = 24, Monthly = 12)
21. Should Payroll integrate to General Ledger? .....
(Yes or no ---Of course you must have purchased our G/L)
22. Is Job Costing to be included? (yes or no) .....
23. State tax to be included? Which State?.....
(Note: If you have a city tax, send us the booklet and we will include.)

INVENTORY CONTROL

24. Maximum number of items you may have? (Maximum 5000) .....
25. Should Inventory integrate to General Ledger?
(Yes or No. Of course you must have purchased our G/L) .....

Indicate your desired PASSWORD for the systems:(4 characters)
Account Payable .....Accounts Receivable .....General Ledger .....
Payroll .....Inventory Control .....

General Ledger/Cash Journal System

- Although there is limited disk space, no inherent file maximums exist.
- Account numbers are user defined and controlled rather than built into the system. Any numbers from .1 to 99999.8 may be used.
- Transactions can be entered either through Direct Posting, Cash Journal or external sources such as Accounts Payable, Accounts Receivable, Payroll, and Inventory Control or any other user source. The Account Master file validates all transactions before they are accepted.
- Account data is maintained by month for the previous and current years. Account Summary reports provide the beginning and ending balances and all transactions for up to a full year providing a complete audit trail of the entries.
- For full identification of entries, 23 Characters of description are available. The description will print on all activity listings.
- Retained earnings are automatically posted to user-defined account, while gross and net profits may be calculated automatically at any point in the Income Statement.
- Up to nine divisions and summaries for departmentalization or multi-company listings can be used.
- Report generator; allows user to actually create his own reports using any account in the master chart of accounts, in any sequence.
- Budgeting and year-to-year Comparison, in dollars and percentages, is included and accessible through the report generator.

Accounts Receivable/Invoicing/Sales Analysis

- An On-line interactive System.
- File size limited only by available disk space.
- An Invoice oriented system. Prints the actual Invoice. Up to 51 individual items may be billed on a single invoice.
- Sales Analysis with commission reporting. By product or by sales.
- Mailing and shipping label program, alphabetic or zip code sequence, range selection capability.
- Extends a line item, totals and computes sales Tax if applicable. Taxable and non-taxable item may be mixed on the same invoice.
- If linked to Inventory system, part number will be searched in Inventory Master File and price and description will be displayed on invoice and Inventory updated.
- Maintains a file of terms descriptions for ease of entry.
- Each customer has pre-defined sales tax rate and terms code.
- An Invoice can be entered at any time: before it is ready for billing, when it is ready for billing, after it has been billed, and even after it has been paid.
- Provision provided for progress billing, which keeps track of milestone payments made before the invoice has been paid.
- Reports include: listing of invoices not yet billed, open items (unpaid invoices), closed items (paid invoices), and aging analysis of open items, sales update report, sales analysis and seller summary.
- Customer statements are printed.
- Linked to the General ledger system. Will post to the applicable General Ledger accounts.
- Distribution to up to Twenty sales accounts included. Others at user option.
- Calculates service charges at a user defined rate, based upon outstanding charges after 0, 30, 60, or 90 days.
- Full error checking control, and correction capability.

Accounts Payable/Purchase Order Programs

- PURCHASE ORDER capability plus other features.
- An On-line interactive system. Vendor and Invoice files are key controlled and immediately accessible. An invoice linked system. Everything revolves around the invoice.
- Generates the Purchase Order and posts the item to Accounts Payable when the goods are received.
- Calculates and prints checks.
- An aging ledger, 0/30/60/90 days, or any other user chosen basis.
- Linked to the General Ledger system. Will post to the applicable General Ledger accounts. Up to 8 distributions available. Automatically creates distribution for freight, discount, and taxes based upon user defined account numbers.
- Reports consist of open and closed item listings, and an aging summary for all open items.
- Job Costing distribution (up to 8) available to link with Payroll/Job Costing System.
- Prints vendor mailing labels.
- Full error checking, control and correction capability.

Inventory Control System

- An on-line, interactive stock control system.
- Up to 15,000 items with full integration to both our Invoicing and General Ledger Systems.
- Screen Inquiry.
- Selective report printing, by range of vendor and/or range of part code. Cost data suppressible.
- This system has been designed with full recognition that Inventory Control is frequently unique from company to company.
- Easily adaptable to many users.
- Easy to use. Full error checking and prompting. Instruction manual provided. Fully warranted to perform as specified.
- Up to 12 position part code.
